Regarding classification of the above product according to REGULATION (EC) No 1272/2008 and its subsequent amendments, reference is made in the SDS for the above product.

We also certify that during the manufacturing of the above product we do not use or intentionally incorporate into it any of the following materials:

- Candidate list of substances of very high concern in accordance with Article 59(10) of the REACH regulation as published by ECHA on January 17, 2023
- Organotin compounds (TBT, DBT, MBT)

- Perfluoroalkyl and polyfluoroalkyl substances (PFAS) as defined by the OECD 1 :  
"PFASs are defined as fluorinated substances that contain at least one fully fluorinated methyl or methylene carbon atom (without any H/Cl/Br/I atom attached to it), i.e. with a few noted

exceptions, any chemical with at least a perfluorinated methyl group (–CF<sub>3</sub>) or a perfluorinated methylene group (–CF<sub>2</sub>–)”

- Engineered nanomaterials  
Of course, it is well known that many powders (dyestuffs, pigments and additives) used in the production of masterbatches /compounds include particles in the nano range. The lowest part of the particle size distribution of those powders can be in the nano range. Those powders are not marketed as nanomaterials, nor are they necessarily specifically engineered or manufactured to be in the <100nm range. In polymer applications these powders are encapsulated in the polymer matrix.
- Recyclates/Recycled materials according to Commission regulation (EU) 282/2008/EC of 27 March 2008 and amended up to (EU) 2015/1906 of 22 October 2015 on recycled plastic materials and articles intended to come into contact with foods.

- Genitically modified organisms (GMO)  
However, our suppliers also use some substances derived from organisms as starting materials for synthesis or components of mixtures (e. g. fatty acid derived alcohols or enzymes).

Due to the complexity of the channels of trade, it cannot be excluded that some of these raw materials may originate from, but do not themselves contain, genetically modified organisms (GMO's).

Such raw materials pass through a range of chemical transformation processes and purification steps and are, therefore, considered to be safe.
