Migration testing has to be performed by the end-user on the final item, according to the expected use conditions, to verify the compliance with the applicable statutory limits. The tests of overall migration are particularly critical for fatty foodstuffs.

Converters/end users that may use our mentioned products in mixture with other polymers, may obtain products fulfilling the applicable migration limit requirements.

The products do not contain substances authorized as flavourings, nor as direct food additives with restrictions in the Regulation (EC) 1333/2008 (Dual Additives).

We confirm that our mentioned products are manufactured using the good manufacturing practices (GMP) recommended by Regulation (EC) 2023/2006 and that our quality management system ensure the traceability required by the Regulation (EC) No 1935/2004.

We point out that it is a responsibility of the end users to ensure that materials and articles, manufactured with good manufacturing practice (Regulation (EC) 2023/2006), under the normal or foreseeable conditions of use, do not transfer their constituents to foodstuffs in quantities which could endanger human health and/or bring unacceptable changes in the composition of the foodstuffs or a deterioration in the organoleptic properties (Regulation (EC) No 1935/2004).
