

ATTESTATION

SILBIONE FLD 70047V100

INFORMATION LETTER ON REACH FOR PRODUCTS MADE IN EUROPE (EU)

Dear Customer,

REACH is the European Union (EU) regulation (EC 1907/2006) on the safe handling and use of chemicals that entered into force in 2007. It deals with the **R**egistration, **E**valuation, **A**uthorisation and **R**estriction of **C**hemicals.

Manufacturers and importers of substances are required to gather information on the properties of their chemical substances, to assess hazards and risks of the substances, to identify and implement the risk management measures to protect humans and the environment and to supply this information along the downstream supply chain.

Therefore, all Elkem Silicones Legal entities in Europe, as European silicone manufacturer or importer, ensure that all the relevant substances (including relevant monomers and/or reactants if applicable) of the above-mentioned product are REACH compliant either because:

- They have been REACH registered by Elkem Silicones or by its suppliers
- Or they are exempt from the provision of Registration

As such a non-EU customer purchasing directly the product manufactured in EU, could re-import the product to its downstream EU customer without further registration obligations under REACH.

This attestation is not an export compliance document and Elkem Silicones does not accept responsibility for determination of its customer's compliance with export/import regulations.

Note: Additional REACH information is also available:

- Registration numbers for hazardous ingredients will be listed in section 3.1 of EU format Safety Data Sheets (SDS);
- Identified safe uses will be communicated through our extended Safety Data Sheets (eSDS).
- Additional REACH guidance can be found at <https://echa.europa.eu/regulations/reach/understanding-reach>

Certified by Elkem Silicones Product Stewardship Department
