**Bovine and Transmissible Spongiform
Encephalopathies (BSE/TSE)**

Dear Customer,

With reference to,

- Regulation 1069/2009/EC of the European Parliament as amended, laying down health rules as regards animal by-products and derived products not intended for human consumption, and
- Guidance EMEA/410/01 Rev.3,

Please be advised that based on our knowledge of the manufacturing process and the information available to us from our raw material suppliers, we hereby declare that the material manufactured and sold by POLYTECHNYL - Engineering Plastics in Europe under the trade name

TECHNYL ® A 216 NATURAL FA

contains as additives of animal origin for which suppliers confirm they fulfil the conditions of temperature, pressure and time recommended in the Guidance EMEA/410/01 Rev.3 and in Regulation (EC) 1069/2009.

Accordingly, **transmission of encephalopathy agents via the mentioned materials is highly improbable.**

This statement applies to materials as supplied by POLYTECHNYL S.A.S. Engineering Plastics and without any further modifications in the composition, resulting from processing or inadequate use and/or storage of the above-mentioned product.

Yours sincerely

Your DOMO team

The above information is provided for our customers only (and we accept no liability to any third parties) and reflects our current knowledge and experience of the product at the date of the issue. All products are supplied following our general terms and conditions for sale. We can accept no liability for the effects of any chemical combinations or mixtures of the product which are carried out by our customers or third parties. In using the product our customers are reminded to comply with all relevant legal, administrative and regulatory requirements and procedures relating to its use and the protection of the environment.

Absence Declaration

Dear Customer,

Please be advised that based on our knowledge of the manufacturing process and the information available to us from our raw material suppliers, we hereby declare that the material manufactured and sold by POLYTECHNYL - Engineering Plastics in Europe under the trade name

TECHNYL ® A 216 NATURAL FA

does not contain as intentional additives:

- any of the most hazardous substances, in particular, those that are Carcinogenic, Mutagenic, toxic for Reproduction (CMR) listed in Annex VI of the Regulation (EC) No 1272/2008 of the European Parliament on the Classification, Labelling and Packaging of substances and mixtures (CLP Regulation);
- any "Natural rubber latex", "Dry natural latex", "Synthetic latex", or "Rubber that contains natural rubber"
- any of the Allergens listed in Annex II of Regulation (EC) No 1169/2011 on the provision of food information to consumers and amendments in force (up to 2015/2283).

Because we do not expect these substances to be present, we do not specifically run any analysis on our raw materials or end product to measure for these substances.

This statement applies to materials as supplied by POLYTECHNYL S.A.S. Engineering Plastics and without any further modifications in the composition, resulting from processing or inadequate use and/or storage of the above-mentioned product.

Yours sincerely
Your DOMO team

PRESS RELEASE

31 January 2020

DOMO Chemicals completes the acquisition of Solvay's Performance Polyamides Business in Europe

Leuna, 31 January 2020 - DOMO Chemicals, a leading producer of high-quality engineering materials for a diverse range of markets, today announced that the company has completed its acquisition of Solvay's Performance Polyamides Business in Europe.

This Business includes Engineering Plastics operations in France and Poland; High Performance Fibers in France; Polymer and Intermediates operations in France, Spain and Poland. The Business comprises Production, Sales, Technical Support, R&D and Innovation services in France, Spain, Poland, Germany and Italy that currently have a combined headcount of approximately 1,100 employees. The agreement also involves a joint venture between BASF and DOMO in France for the production of Adipic Acid.

Yves Bonte, DOMO Chemicals CEO, says: "This acquisition is a significant milestone on our path to strengthen DOMO Chemicals' nylon-based engineering materials business. It is an important step in delivering on our sustainable growth strategy by combining and leveraging on the unique technology, development and design capabilities of our combined teams to become a major global service provider to our customers in our key markets Transportation, Electrical & Electronics and Consumer goods."

Mr. Bonte added: "As a final step in the acquisition, we will now start our process of exploring and integrating the complementary strengths of the diverse teams and talents. Our prime focus will continue to be serving our customers' needs and meeting their requirements as we set out to become a unique integrated Nylon (6 and 6.6) solution provider".

"New and existing customers of both Domo Chemicals and the acquired Business will now be able to access even more high quality, innovative and sustainable solutions for their development of processes, products and applications in the ongoing very dynamic market environment", summarizes Mr. Bonte.

About DOMO Chemicals

DOMO Chemicals is a leading producer of high-quality engineering nylon materials for a diverse range of markets, including the automotive, food, medical, pharmaceutical, chemicals and electronics industries. The company offers a complete portfolio of integrated nylon 6 and 66 products, including intermediates, resins, engineering plastics, performance fibres, packaging film and distribution of petrochemical products. Headquartered in Germany, the family-owned company leverages advanced technology and consumer insights to deliver sustainable & innovative solutions. DOMO generated 2019 sales over EUR 900 million and employs in 2020 approximately 2200 employees worldwide.
